DESIGN TIPS: SCODIX FOIL (GOLD)
## CREATING AN ENHANCEMENT FILE FOR SCODIX FOIL
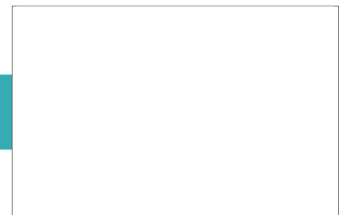

Let customers feel your creativity – literally.

Scodix will help your print outshine the competition and deliver truly memorable results. Making even the most imaginative ideas a reality, with dazzling effects that aren't just the stuff of dreams.
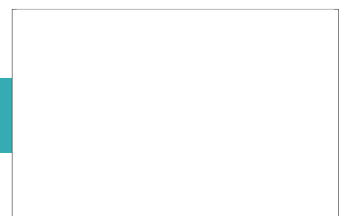

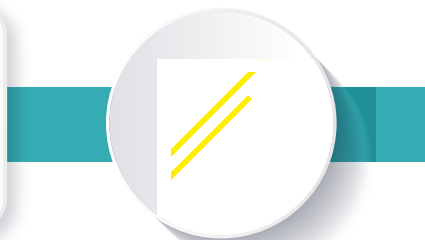

Create a new colour swatch. Change the colour type to **Spot** and label the swatch name **Gold**. Choose a colour that enables you to easily identify foil elements within your document, such as **100% Yellow**.

Duplicate pages you're adding foil to, select areas you want foiled and colour them with the Gold swatch. **Removing foil elements from original printed pages.**

Be sure to leave a **2mm clear area** around the edge of the design and fold areas. This is required to avoid cracking when cut by the guillotine.

Supplied PDF must contain both print, foil elements and blank page as a single file (shown below). See our scodix file preparation guide for more information.

Page 1: **Front**   Page 2: **Back**   Page 3: **Foil**   Page 4: **Blank**
