

# WIRO BOUND TIPS

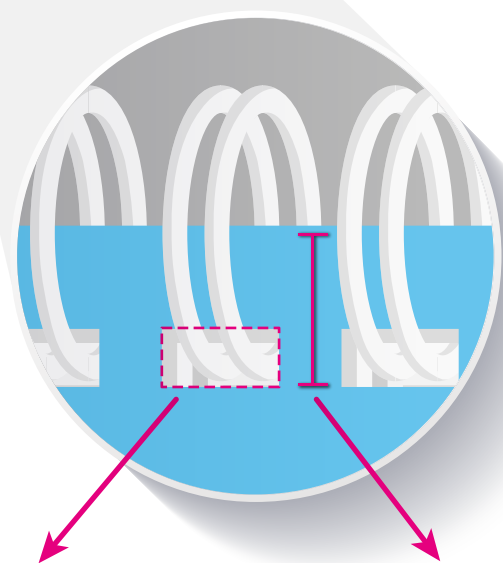

## PREPARING YOUR ARTWORK FOR BINDING

### Leaving Space For Binding

When designing artwork for a product that is wiro bound, we recommend a minimum 10mm *quiet border*\* on the edge of each page that is to be bound. i.e. an area of at least 10mm from the edge of the page to the first text/graphic. This is to avoid content being lost when pages are cut.

Please note we work to a 5mm wire hole when designing your artwork.

5mm punched hole

10mm quiet border

\*Quiet Border - This is the distance you should allow from the edges of the finished page size for no text or images to go into bleed.
